Self-financed

An idea which became reality

With the e-commerce landscape changing faster than ever, organizations are facing the challenge to adjust to its dynamics. 'merce sets a new benchmark for digital commerce platforms, enabling businesses to grow at their own pace and execute their unique strategies.

Sustainable business model

We designed a business model, where all elements required to run successful online operations are delivered as a single service.

With Commerce as a Service (CaaS), retailers and distributors can focus on solving their business challenges, while we take the full responsibility of the technology that fuels their businesses.

Commerce as a Service

More revenues, better
predictability.

Solid foundation

Committed to delivering value to our customers since 2009.

Management Team

Our vision stems from the values laid down by the management team when they founded the company in 2009.

Paweł Szewczyk
CMO

Led the go-to market operations for many leading e-commerce stores.

Paweł Jaczewski
CTO

Industry veteran. Created his first custom e-commerce platform 16 years ago.

Krzysztof Jaciw
CFO

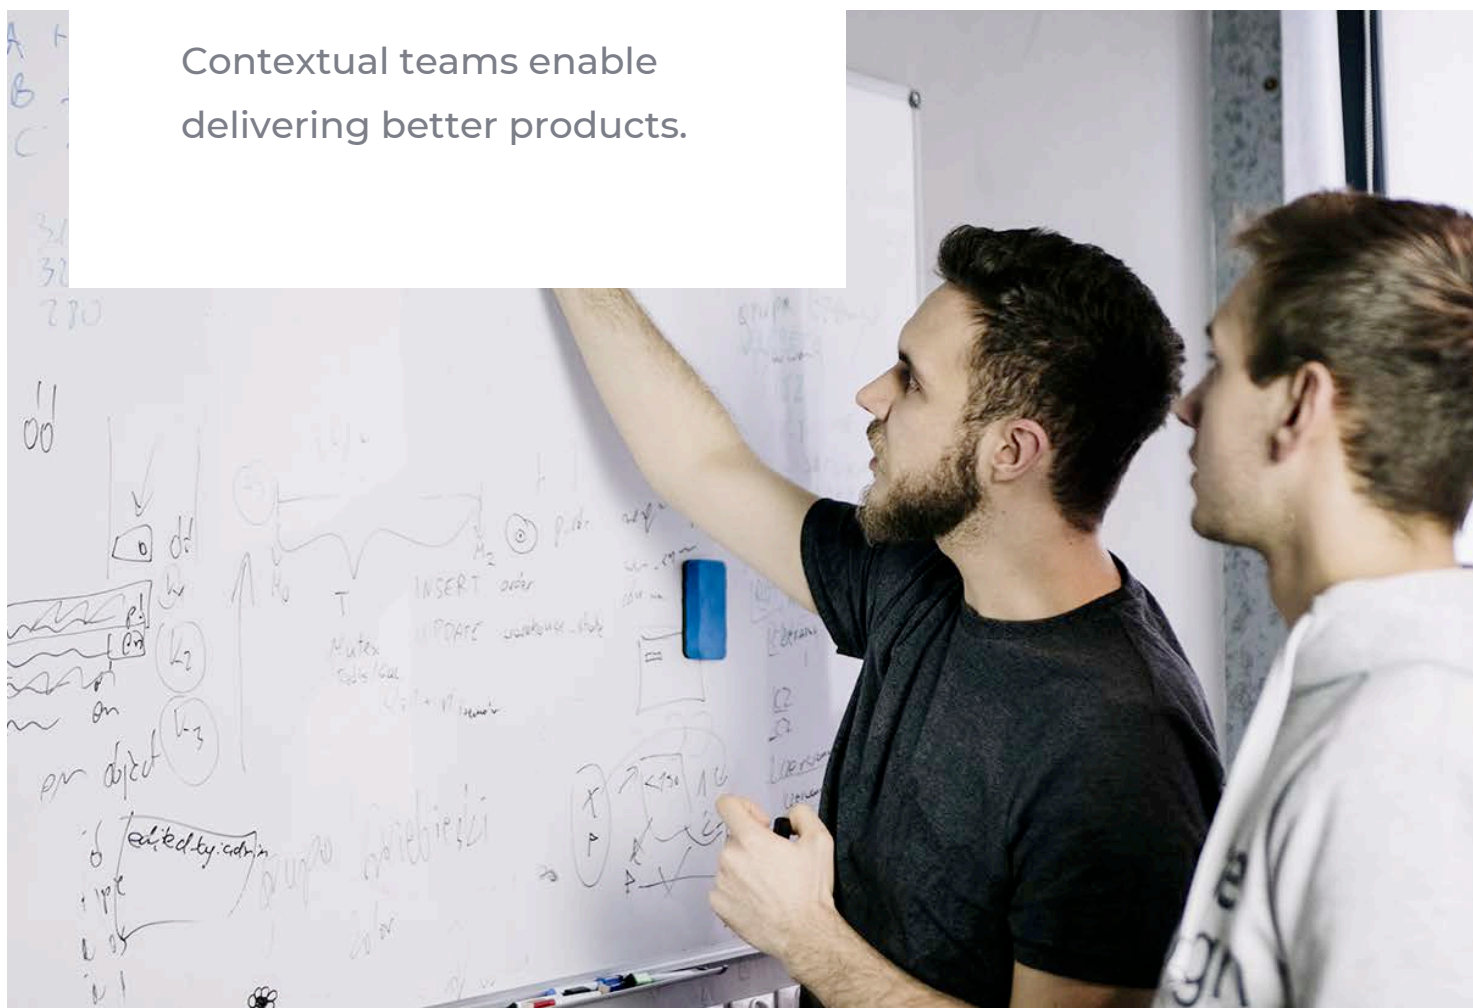

Multi-entrepreneur with vast experience in the tech industry.

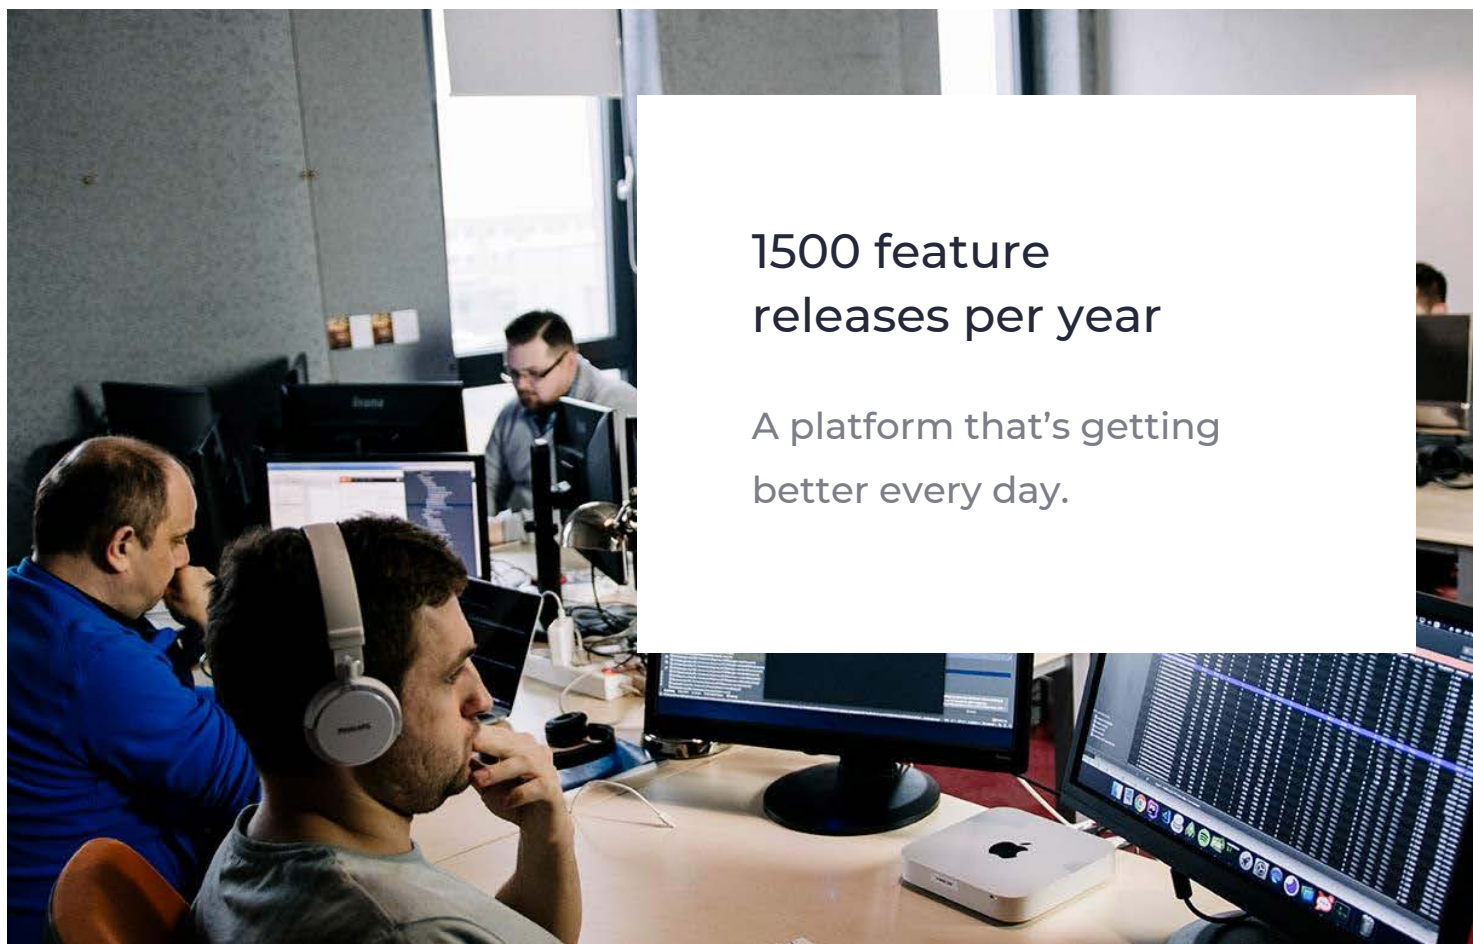

Our Experts

Our team comprises of over 100 experienced e-commerce specialists, formed into contextual teams. With contextual teams, we gather the best industry talents and let them focus on a single area where they can thrive the most. This approach lets us constantly deliver a robust product with a clear and ambitious roadmap.

Laser-focused team

Contextual teams enable delivering better products.

1500 feature
releases per year

A platform that's getting
better every day.

Enabling growth with technology

How to win in the competitive landscape? Employ technology which helps you to be more flexible while maintaining your independence.

With over 1 500 pre-tested feature releases per year and architecture that adjust to unique business scenarios, 'merce platform helps to achieve short and long-term business goals and reduces growth limitations.

Shaping the future

Delivering capabilities
that improve the commerce
experience

R&D is the fuel of change

By delivering a product built for the years ahead, we help our customer to address their present and future challenges. Our recent technology add ons include:

01 Hybrid-Tenant Cloud

A new e-commerce cloud model. Enables businesses to be more secure, independent and flexible while reducing their operating costs.

02 Decoupled (Headless) Architecture

Truly flexible environment for growth. Gives businesses ability to scale faster than ever by launching new storefronts at rapid pace.

03 Kubernetes container-orchestration platform

The new standard for cloud applications deployment. Dynamically allocates resources to limit bottlenecks and system downtimes.

About 'merce

'merce connects technology with expertise, enabling organizations to bring their unique commerce vision to life.

With a holistic approach to solution delivery, we cover every layer of the digital commerce stack – from designing infrastructure to connecting customer touch points.

By aligning flexible and scalable technology with business challenges and processes that flow deep within organizations, we enable them to grow at their own pace and deliver on customer promises.
